

Learning Project 2 - 18/05/20

Year 6 – What does the Future Hold? – Blocks 3 & 4

Let's be Prepared! Transition

Write a letter to your future self.
Research, plan and write a persuasive letter to yourself for getting the most from secondary school. Motivational tips and ideas to make you a winner like, 'Kid President' style. You could video it!
<https://www.youtube.com/watch?v=u1zNH0YmhUI>

Fill in the transition booklet doc.
Explore, research and find out about your new school by completing the attached 'Transition' to Year 7. The introduction explains the tasks and purpose of the booklet. Enjoy its many activities!

Preparing for my Future

Well Being - Changes

Create a mind map with you in the centre.
In it, place the things that have changed about you on the outside of your drawing. They can be physical changes, emotional, things at home or things you do. On the inside write things that will not change about you. Finally, list what is good about change. See also link –

LET'S GET ACTIVE!

Be inspired by Captain Tom and see how many laps of your garden you can do. Lead a fitness workout with your family. It's great exercise. You can twitter it @ScarthJ

DON'T FORGET TO JOIN JOE WICKS FOR DAILY WORKOUTS LIVE ON YOUTUBE @ 9AM

Let's be CREATIVE! My Future in Pop Art

'We're in it together' is a slogan for this present pandemic, we are in. But it is true about moving on in to new areas of our lives. As friends and family we will still have connections to keep us going at our next school.

Look at the image below! Draw a self-portrait or print off a photo of yourself and place at the centre of the paper. In colorful blocks around, add in images that represent you. Hobbies, talents, favourite things, things that are special to you. Include some hope & dreams you want to achieve for the future.

So, draw a large circle on a square piece of paper or card and cut it into 4 equal pieces. Using paint, crayons or felts create and draw a design. It can have a pattern, image or positive word to motivate you. Each quarter should be different and when fitted together work as one. This is like family and friendship. All different but together we are great! Swap bits with family.

Let's be SCIENTISTS!

Can you Adapt?

Watch this different clip about Darwin and Evolution and make notes!
<https://www.bbc.co.uk/bitesize/topics/zvnhvcw/articles/z9qs4qt>

Write a biography of Charles Darwin, his life and work on Evolution & Adaption. Then draw some diagrams and explain how certain animals have evolved over time. Include human.

Through research, by using books at home, online resources or knowledge from family and friends, **find out about 'Inheritance'** - Then create a table listing all the features you could have inherited from your parents and on the other side features you do not inherit from parents!

LET'S GET COOKING!

Share something new you have made/tried during 'lockdown' - I tried a Selkirk Bannock tea cake! It was delicious. **What have you tried? Write a food diary from the week and rate your meals. Try something new!**

What else do you make with bread that is different?
Tweet, share your recipes with us! Draw and label.

LET'S BE GEOGRAPHERS!

The daily bbc bitesize lessons have one on the Solar System. Watch and try out the activities.
<https://www.bbc.co.uk/bitesize/articles/zk7fv9q>
What do you know about planet Earth?

Although Space is part of science this time I want you to try and make a model of the Solar System and planets in the correct order. You can use small balls, coat hangers and string to make the **hanging DT model**. Then make a PowerPoint type presentation about natural phenomena's such as hurricanes and earthquakes. Did you know it can rain diamonds on Jupiter and Saturn has had storms that rage for months!

Be SOLE

Take **any subject area** here about space or your hopes and **create your own project** then present in a medium you like!

Don't forget to gmail Mr Graves and I your presentations, docs, pics or just tell us about what you have done!
