

Year 4 Home Learning - w/c 18 May

There are so many things on social media suggesting what you can do with your children during this strange time and for some of us there is simply too much to take in. We've put together a timetable that you may find useful. There is no expectation, as we have said previously, that you and your child complete any or all of this. We really do appreciate that all families are finding themselves in very unfamiliar circumstances. Just know that your child's wellbeing is at the fore of all we are doing.

Amazing Facts about the Human Body

- 8 • Your heart beats around one hundred thousand times
- 19 per day. This means that in one year it has pumped
- 28 around three million litres of blood around your body.

- 35 • Your nose can tell the difference between
- 39 one trillion different smells.

- 49 • The acid inside your stomach that helps you to digest
- 54 food can actually dissolve metal.

- 60 • The smallest bone in the human
- 66 body can be found inside the
- 73 ear. It is called the stapes (or
- 79 stirrup) bone and it is only
- 83 around three millimetres long.

- 88 • Your nose and ears continue
- 90 growing throughout
- 93 your entire life.

- 98 • As well as having unique
- 103 finger prints, all humans also
- 107 have unique tongue prints!

Quick Questions

1. What do you think the word 'unique' means?

2. What are the two names for the smallest bone in the human body?

3. Give one reason why the author may have chosen to use bullet points to present this information.

4. Why do you think the author chose these particular facts?

Great Galapagos

11 Thank you for joining us today; my name is David and
22 I will be your tour guide. The Pacific Ocean and the
30 enchanted volcanic islands of Galapagos are places unlike
40 any other. They are home to an incredible collection of
49 animals who have adapted to the harsh landscape around
58 them. Most of them were discovered by an astounded
69 Charles Darwin on his first trip to these islands over two
72 hundred years ago.

83 On our right, you can see one of the islands' most
90 remarkable inhabitants – the giant tortoise. There are
102 hundreds of them on the beach at any time, lying in the
112 sun to warm their blood and gather energy. Many may
124 be older than you are right now and some will live for
130 over one hundred years. Impressive, right?

Quick Questions

1. Who discovered most of the animals on the Galapagos Islands?

2. Sum up the second paragraph in 20 words or less.

3. How has the author made the Galapagos Islands sound special within the text?

4. Name one other creature you could expect to see on this tour.

Year 4 Home Learning - w/c 25 May

There are so many things on social media suggesting what you can do with your children during this strange time and for some of us there is simply too much to take in. We've put together a timetable that you may find useful. There is no expectation, as we have said previously, that you and your child complete any or all of this. We really do appreciate that all families are finding themselves in very unfamiliar circumstances. Just know that your child's wellbeing is at the fore of all we are doing.

Incredible Invertebrates!

10 Invertebrates are a species of animal that do not have
18 a back bone. Mammals, amphibians, reptiles, fish and
29 birds do not fit into this category because they all have
38 vertebrae (spinal bones), but these animals make up less
49 than 4% of all the animal species on Earth. This means
58 that around 96% of animal species alive are invertebrates.
66 These include marine invertebrates and molluscs, such as
75 sponges, jellyfish and oysters, as well as crustaceans and
82 insects, such as crabs, shrimp and butterflies.

91 The largest invertebrate ever recorded was a giant squid
99 that measured 13m long. The smallest invertebrates are
110 so tiny that they cannot be seen by the naked eye.

Quick Questions

1. Write a short definition of the word 'invertebrate'.

2. What percentage of animals on Earth actually have spinal bones?

3. Who do you think this information is for?

4. Write two questions that you could find the answers to in this text.

a.

b.

Emma's Puppy Problem

11 As soon as she turned eight years old, Emma knew that
21 she was old enough for the responsibility of looking after
33 a puppy. She had even promised to start doing all of the
46 things you would do with a dog to prove to her boring dad
58 that she could. Emma knew she had to go on long walks
70 twice a day, although she did not get out of bed before
80 midday. She watered the plants in the house every day
89 to prove that she could keep something alive, although
100 she watered them a bit too much. Emma also knew one
110 thing for certain: she would not be picking up anything
122 that the dog left in the back garden. Not once. Not ever.
127 That was her dad's job.

Quick Questions

1. Who is stopping Emma from getting a puppy?

2. Why do you think that the author describes dad as 'boring'?

3. What makes you think that Emma is not ready to get a puppy? Use evidence from the text.

4. Summarise the main point of this story in 20 words or less.
